AIRPORT NOISE  
MITIGATION  
SYMPOSIUM

## The 11<sup>th</sup> Annual Airport Noise Mitigation Symposium

(ANMS) brings together noise mitigation experts from across the country including the FAA, airports, community groups, consultants, and manufacturers — to share their collective experiences and ideas to maximize the benefits of noise mitigation. The ANMS Planning Committee in cooperation with the American Association of Airport Executives (AAAE), is pleased to host this year's symposium in St. Louis, MO. Each year, the symposium focuses on a variety of topics that address emerging trends and challenges associated with sound insulation and land acquisition and features a mix of guest speakers, interactive discussions, and break out groups.

**The ANMS Planning Committee** is comprised of dedicated individuals representing various disciplines within the noise mitigation field. Each year committee members create the symposium agenda and plan group activities that include multiple opportunities to network among industry professionals.

Activities associated with the 11<sup>th</sup> Annual ANMS are made possible through tremendous support from Lambert-St. Louis International Airport. More donations are needed to facilitate the type of activities symposium participants have come to expect. The following pages illustrate the level of support and benefits associated with sponsorship. We appreciate your assistance and look forward to seeing you in St. Louis!
